

## State Innovation Model (SIM) Design Project – Identifying Stakeholders

### *Collaborative Members-*

Please review this form and identify individuals and groups that should be involved in the development of the state model for the SIM Project. Below are areas of the model that will require attention. Try to list individuals and/or groups that would best fit a model component based on the expertise of the individual and/or skills or services offered by the group.

Model Area of Emphasis	Individual	Group/Organization
<b>Identify baseline population health status</b>		
<b>Identify primary and secondary drivers of population health</b>		
<b>Describe the baseline health care environment</b>		
<b>Identify state regulatory and policy levers for health care</b>		
<b>Select care delivery models</b>		

---

Model Area of Emphasis	Individual	Group/Organization
<b>Identify payment methodology needs</b>		
<b>Develop infrastructure needs for health care delivery</b>		
<b>Identify health information technology and HIE needs with regard to population health plan</b>		
<b>Identify health information technology and HIE needs with regard to health care delivery and payment methodology</b>		
<b>Identify workforce and training needs for health care model</b>		
<b>Review draft of state health system innovation plan</b>		

---
